

NIS2 Vulnerability Management Compliance

EU Directive 2022/2555 - Article 21 Assessment

Generated: 2026-07-21 11:48 UTC

Status: **NON-COMPLIANT**

Metric	Value
Total Vulnerabilities Tracked	288
Known Exploited (CISA KEV)	2
Remediated	0
Pending Remediation	288
Remediation Rate	0.0%
Critical Pending	13
Overdue	0
Ransomware Exposure	0
Mean Time to Remediate	N/A

Supply Chain Visibility (Article 21(2)(d))

Metric	Value
Monitored Endpoints	1
Tracked Products	197
CPE Identification Coverage	0.0%

Recommendations

- **CRITICAL:** 13 critical-severity vulnerabilities pending remediation.
- **VISIBILITY GAP:** Only 0.0% of products have CPE identification. Assign CPE to remaining products for complete vulnerability coverage.

This report was automatically generated by SentiKat based on vulnerability data collected from monitored endpoints and cross-referenced against the CISA Known Exploited Vulnerabilities catalog and vendor security advisories. The data reflects the state of the system at the time of generation. This report has not been independently audited or certified by a third party.
